EXPERIENCE

Contract, Remote — FullStack Developer

May 2018 - PRESENT

Designed and Developed SaaS based Route Planning system. System allows clients to optimally route their assets for given arrival time and provide real time tracking and traffic aware eta time of assets.

Designed inhouse custom routing automation algorithm which efficiently routes the assets and eliminates 70% of manual routing work.

System also lessens the burden of big spreadsheets to maintain assets and routing for clients as they can use customisable reporting provided by the system.

Hawkscode, Jaipur — Software Developer
